Abdul Muqeet Ahmed

+1 (657) 217-9622 | abdmuqeeta@gmail.com | LinkedIn | GitHub | Portfolio

Education

California State University, Fullerton, California Aug 2025 – May 2027(Expected)
Master of Science in Computer Science *GPA: 3.7/4.0*
Coursework: Artificial Intelligence, Adv Blockchain Technologies, Web Backend Engineering

Work Experience

HCLSoftware August 2023 – August 2025
Software Engineer *Pune, India*

- Contributed to IBM Informix RDBMS development, working on C-based backend components (Linux, PowerLE, Windows), optimizing query execution, memory management, buffer pools, concurrency control, and kernel-level features to improve stability and reliability..
- Diagnosed and resolved **50+ defects** in a large-scale C codebase, including **20+ high-priority** issues (segmentation faults, deadlocks, race conditions), reducing post-release defects by **30–35%**.
- Automated regression testing and debugging using shell scripting and SQL, cutting manual effort by **35–40%** and investigation time by **20%**, while collaborating with QA/DevOps across **10+** Agile release cycles (Git, Jenkins, Docker, ClearQuest, ClearCase).

Brainovision Solutions Jan 2022 – June 2022
Full Stack Developer Intern *Hyderabad, India*

- Built and optimized MERN stack applications, developing RESTful APIs (Node.js, Express) and indexed MongoDB schemas, improving API response time by **25–30%** and reducing query latency by **20%**.
- Developed responsive React.js components with optimized state management, reducing page load time by **20%**, and delivered **5+ feature** releases in a remote Agile/Scrum setup (Git, Jira).

Projects

Study Material Organizer GitHub

- Built a role-based Android app (Xamarin, Node.js, MongoDB) with secure auth and indexed NoSQL schemas, reducing search time by **75%** and delivering sub-second responses. Supported **1,000+ uploads, 200+ users, and handled 10,000K+ API requests/day** in a scalable, cloud-ready architecture.

Advanced Chat bot: Beebot GitHub

- Developed an AI-powered chatbot using ML-based intent classification and NLP pipelines, integrating speech-to-text and text-to-speech for multi modal interaction, achieving **92%** intent accuracy, **<500 ms latency**, handling **1,000+ queries**, and delivering a cloud-ready, API-driven architecture.

Stock News Sentiment Analysis System GitHub

- Engineered an ML-based stock news sentiment system (Naïve Bayes, TF-IDF bigrams) trained on 65,000+ articles, deployed via FastAPI, web UI, and Chrome extension. Achieved **80%+ accuracy,** < 300 **ms latency, and processed 1,000+ headlines/min** in a cloud-ready FinTech architecture.

Recognitions

Paper Presentation at **9th ICCM 2023**, Certified in OCI, PCAP, CCNA, Prompt Engineering, C Programming, **2nd Price** on Seminar presentation on the topic "RPA(Robotic Process Automation)". **Hobbies:** Gaming, Traveling, Gym, Photography

Technical Skills

Languages: C, C++, C#, Java, Python, SQL, Rust, Go, Ruby, Perl, PHP, Solidity, LaTEx
Frameworks: .NET Core, Spring, Docker, Kubernetes, NextJS, OpenGL, Flask, Express, GraphQL
Web Development: Node.js, Express.js, React.js, HTML5, CSS3, JSON, XML, Angular.js, React, TypeScript
Tools: JIRA, Jenkins, GitHub, MS Visual Studio, MS Office Suite, Figma, Axure, Excel, Prisma , Cloud
Skills: Front end, Backend, web development, video editing, gaming, Prompt Engineering, Presentation
Project Management: Agile, Scrum, Confluence, Slack, ClearQuest, Communication
AI/ML: ML Fundamentals, NLP, Naïve Bayes, TF-IDF, scikit-learn, NLTK, Agentic AI Concepts, LLMs.
